# Cloud Transformation using Agilisium Data Consulting Jumpstart

Define the future roadmap of your Enterprise Data Platform, in 4 Weeks

Align your business strategy and derive powerful insights using an end-to-end Solution Architecture, leveraged by cloud-based services like AWS, SnapLogic et.al.

## KEY

### ACTIVITIES

- Collaborate with stakeholders via Staged Interview Process
- Analyze existing/envisioned Architecture & Solution
- Understand Business Objectives
- Triple constraint baselining – Scope, Schedule and Cost

## ENGAGEMENT

### OUTCOME

-  Concrete future-state architecture, aligned to business goals
-  Detailed Project plan that defines Project specifics and Execution approach
-  Recommendations & industry best practices to meet requirements and mitigate process gaps, if any

## VALUE

### LEVERS

5x faster Architecture & Solution Analysis using RAID (Rapid Automated Information Detector)

7x faster estimate on effort & cost, using Agilisium Calculation Engine

# OUR APPROACH

## ASSESS

### Assess Landscape

- Functional Documentation
- Architecture & Road Map
- Conceptual Architecture

### Gap Analysis

- Business Pain Points
- IT Pain Points

### Goals

- Enterprise Data Platform Goals

## IDEATE

### Meet the End-users

- Interview/Discussions
- Scope/Assumptions for new Enterprise Data Platform
- Requirements viability analysis

### Solutioning

- Solutioning Approach & Architecture
- Capacity & Sizing
- Migration Strategy
- High-level resourcing plan

## DEFINE

### Project Charter

- Finalize Implementation Option
- Detailed Project Plan
- Devise Release Iterations
- Resource mapping & On-boarding plan
- High-level timeline & deliverables chart

## CUSTOMER CONTRIBUTION

- Define requirements for One Business Unit / Division
- Provide all project documents during Architecture Assessment Phase
- Provide environment access, aligned to engagement schedule (Applicable for Migration engagements)
- Provide 500 mappings with 60% medium complexity (Applicable for Migration engagements)
- Facilitate 100% customer stakeholder availability, to liaison the reviews & approvals of the Staged Interview Process

\*Conditions applicable based on pre-requisites on customer contribution

\*Commercials based on Onshore - Offshore operating model

Agilisium is a Los Angeles based Big Data and Analytics Company with clear focus on helping organizations accelerate their "Data-to-Insights-Leap". To this end, Agilisium has invested in all stages of data journey: Data Architecture Consulting, Data Integration, Data Storage, Data Governance and Data Analytics. With advanced Design Thinking capabilities, a thriving Partner Eco-system and top-notch industry certifications, Agilisium is inherently vested in our clients' success.
