Identify performance improvement areas using Agilisiium ACE Framework

With our 360° guidance, achieve peak performance with an optimized Enterprise Data Integration Solution

Take advantage of our ACE (Accelerated Constraints Evaluator) framework to perform complete health-check on your Data Engineering performance. Dual powered with expertise and capabilities, ACE can provide vital recommendations on areas of improvement to facilitate optimum performance.

KEY

ACTIVITIES

- Detect system gaps
- Assess defective zones
- Execute Assurance checklist

VALUE

LEVERS

Detailed health-check report, highlighting system-gaps and areas of improvement

Roadmap to apply fixes to mitigate all the gaps

ENGAGEMENT OUTCOME

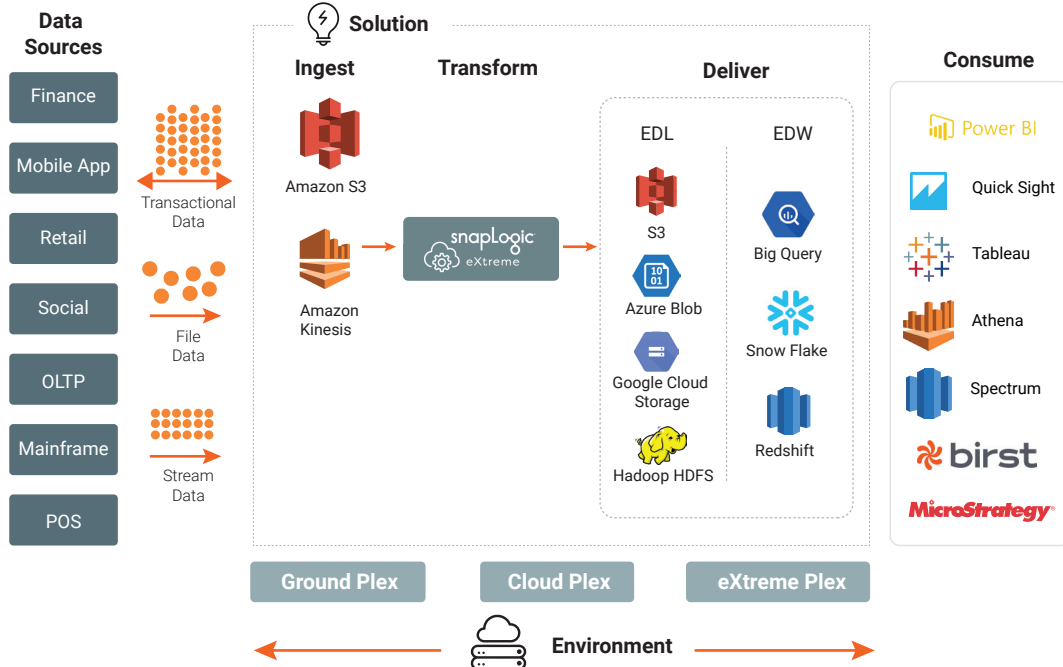

Recommendation focal points:

- Priority Matrix
- Source Integration scheme
- Plex configuration
- Pipeline configuration & Parameter tuning
- Design best practices
- Pipeline Logic correction
