

Netezza and Any DB to Redshift Migration Assessment

\$25K to \$45K* | 2 Weeks to 4 Weeks

Advanced Consulting Partner

Data & Analytics

DevOps

83% of data migration projects either fail outright or exceed their budgets and schedules – Gartner

Many Enterprises invest poorly on assessment and planning phase, setting themselves up for failure

NETEZZA TWINFIN/MAKO | IBM PUREDATA | ORACLE EXADATA | GREENPLUM | VERTICA | SQL SERVER | HADOOP

DISCOVERY

- Understand the Current State environment and the desired future state outcomes

KEY ACTIVITIES

Analysis: Detailed analysis of the current DBMS environment, including DDL dump and XML Dump

Best Practices: Expand the Customer knowledge of Amazon Redshift and other related AWS tools including best practices, architectural designs, migration patterns, and customer references

Recommendation: Recommend a high level schema/ETL/application migration architecture and plan to facilitate delivery: (Lift and Shift/Forklift with enhancements)

- Strategic: Future state in AWS
- Tactical: Full or Partial Migration

OUTCOME

- Joint vision around cost savings, and migration strategy and future state
- Current System Report
- Data Placement/Rationalization Study
- Future State Architecture AWS
- Migration Approach, Tasks, Timeline Detailed Cost, Resource Plan

*System Access not required
