

Enabling predictable migration via highly detailed, expert-built toolkits

Rapid, comprehensive assessment

DISCOVERY QUESTIONNAIRE:

Short and complete questionnaire to capture innovation requirements, current system details and pain points

DATABASE PARSER:

Analyze DB objects (Tables, SPs, Views, Functions, Join Indexes etc.) and complexity levels from MPPDB's metadata

ETL / XML PARSER

(Informatica, Data Stage, SSIS, Ab initio):

Identify map count, target schemas and tables impacted, insights on ETL transformations used, any in-DB optimization and external scripts used (BTEQ, NZLOAD, FastLoad, PLSQL etc..)

HISTORY LOAD SCRIPT GENERATOR (Informatica, DataStage, Wherescane):

Autogenerate scripts to load historical data from source MPP DB for assessment

DLL Converter:

Converts DDL for Tables and Views from any DB to Redshift

Why Agilisium

Demonstrated Capabilities: Top 3 Redshift Competency Partner in the U.S with razor focus on AWS Data & Analytics solutions

Trusted Enterprise Partner: 15+ PB migrated to AWS and managed till date through \$ 50 MN worth of successful big data analytics projects

Unique Methodology: Toolkit covers key facets uniquely applicable to Redshift and includes expanded questions added by our experienced and certified experts.

Rich corpus of best practices: Growing corpus of rich Redshift best practices from successful delivery of several **100+** TB-scale Big Data Analytics solutions

400-level AWS Experts: 55+ AWS Certified Experts. Our SAs are regular attendees of Area of Depth (AOD) training conducted by AWS Redshift Product team

Other Toolkits:
