

Embedded Analytics powered by Amazon QuickSight

“ Customers tell us that their development teams are constantly looking for new ways to delight their users, and embedding the BI capability directly into their applications is one of the most requested asks from their end users - **Forbes**

“ **Gartner** research demonstrates that 63% of CEOs expect to adopt a product-as-a-service model in the next two years

BENEFITS

- Improved User Experience & Customer Satisfaction
- Uninterrupted business application workflows
- Users need not switch between Business Applications & Standalone BI Dashboards
- Greater productivity

With Dashboards & Analytics delivered within your application and at your finger tips, Embedded Analytics bring significant benefits to organizations.
