

# Agilisium's Windows Optimization and Licensing Assessment

**Book Your Assessment**

aws partner network | service delivery

Amazon EC2 for Microsoft Windows Server

**Be more strategic on planning for the License needs for a dynamically changing environment**

## Key Outcomes

- Assess and optimize current on-premises and cloud environments, based on actual resource utilization, third-party licensing, and application dependencies
- Bring Your Own License (BYOL) and reduce licensing obligations through Optimize CPU and leverage existing licensing in multiple AWS scenarios
- Tooling and subject matter experts to see potential cost savings for migrating your Windows Workloads to AWS
- Understand all available AWS cloud options, how to optimize them and build a roadmap for future licensing

## Success Story

Through Windows OLA, our FMCG client were able to optimize their Windows workloads leading to **47% cost reduction**

**Get started! Save more than 50% in your licensing costs**

# How it works?

## ○ Diagnose

- Identify the existing third-party licenses of Windows Workloads
- Identify the workloads such as Microsoft SQL, Windows Server, etc.
- Identify the right AWS platform such as Amazon EC2 for Windows Server, Amazon Redshift, etc.

## ○ Prepare

- Understanding of the directional business case and drivers for moving to the cloud
- Understanding the directional TCO to move to AWS
- Understanding the potential benefits of AWS over traditional on-premise computing or other cloud solutions
- Lay the foundation for the next phases, a Migration Readiness Assessment (MRA) and Migration Readiness Planning (MRP)

## ○ Optimize

- Rightsize your resources
- Reduce costs
- Flexible licensing options

# What we need from you?

- What are the Windows Workloads that are running on your on-premise environment?
- Availability of business & tech SMEs for discussions
- Access to licenses for diagnosis and optimization
